Practical Title: Semantic HTML5 Pages with Accessibility-Ready Structure

Problem Definition: Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly

A. Theory

1. Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?

Answer: Yes, I have used the header, nav, main, section, aside and footer tags in my html pages in a proper manner.

2. Are form labels, headings, image alt text, and navigation links accessible?

Answer: Yes, all form labels, headings, image alt text and navigation links a properly accessible without any errors.

3. Is the page structure consistent across all pages?

Answer: Yes, the page structure is consistent across all pages. They all have a header, navigation bar, main content and footer.

B. Implementation/ Output/Result

Website Component	HTML Tags used
Page structure	<html>,<head>,<body>
Website header	<header>
Navigation bar	<nav>,<a>
Main content	<main>
Content sections	<section>
Headings	<h1>,<h2>,<h3>
Text	<p>

Images/logo	
Links	<a>
Registration/Login	<form>,<label>,<input>,<button>
Dashboard	<div>,<section>
Profile	<div>,<form>,<input>
Events	<div>,<section>
Footer	<footer>

About StudentHub

StudentHub is a comprehensive portal designed to cater to the needs of students. It provides information about events, news, and resources to enhance the student experience.

Mission

Our mission is to create a vibrant community for students, fostering learning, collaboration, and personal growth through various events and initiatives.

Vision

We envision a platform where students can easily access information, connect with peers, and participate in enriching activities that contribute to their academic and personal development.

Features

- Event Announcements
- News Updates
- Resource Sharing
- Community Engagement

D. GitHub Repository Link:

Link: <https://github.com/prep04-yl/StudentHub-Portal>

E. Challenges Faced:

One problem I faced was linking files through folder paths as the files were in another folder. I learned about the method of writing folder paths in html to link.

F. Learning Outcomes:

Learned the basic structure and syntax of html that is html, head, body.

Learned to create web pages using headings, links, navigation, paragraphs and forms and also connect multiple html pages using hyperlinks.
