Practical Title: Event Management CRUD with Poster Upload and File Validation

Problem Definition: Develop event management functionality for admin users. Admin can add, view, update, delete, and upload event posters with file type and file size validation.

A. Theory

1. Are add, update, and delete functionalities implemented correctly?

Answer: Yes, all event mutation actions are executed via MySQLi queries with database persistence.

2. Is the UI linked with the database correctly?

Answer: Yes, form controls and tables render and submit directly to MySQL database records.

3. Are poster uploads validated for type and size?

Answer: Yes, file extensions check restricts to JPG/PNG and limits size to 2MB.

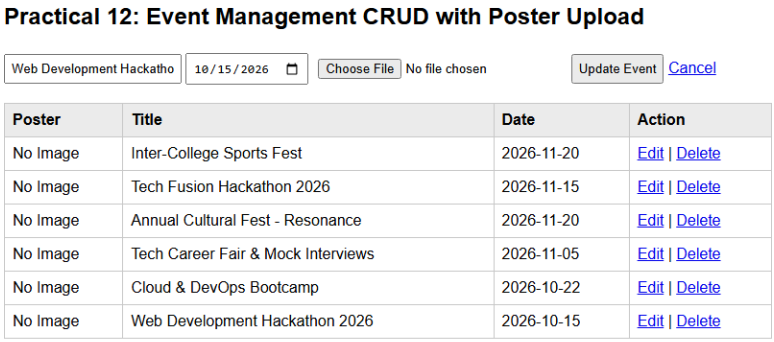

4. Are success and failure messages displayed?

Answer: Yes, dynamic success and error notice bars display after every operation.

B. Implementation/ Output/Result

Feature	Implementation
Event CRUD	Full add, edit, list, and delete operations via MySQLi
Type check	Restricts uploads to JPEG and PNG extensions.
Size check	Rejects image files larger than 2MB.
Storage	Saves files to uploads/ with unique filenames.
Feedback	Displays success and error message alerts.

C. Evidence of Work (Screenshots)

Description: Figure 12.1 events list, edit and upload

D. GitHub Repository Link:

Link: https://github.com/prep04-yl/StudentHub-Portal

E. Challenges Faced:

Validating actual file MIME types securely while removing orphaned images on update/delete.

F. Learning Outcome:

I learned how to implement a secure CRUD module with validated file upload.

Faculty Remarks: (Keep this blank for faculty)
